

Room 5 Senior Kiddie Campus

The month of February sure did fly by; it's hard to believe that spring break will be upon us in just a few weeks. I know we are all looking forward to Spring!

Thank you to all the parents that brought in a special card or candy for Valentine's Day. The children really got excited that they had a whole bag of goodies to take home.

Favorite Activity: Valentine week brought us many fun activities with hearts. We worked on cutting skills by cutting out hearts, we did a science experiment where we learned that candy hearts dissolve when you put them in water. We also sang a "Heart" song. We told the children how writing X-O means you are giving Kisses and Hugs and they have remembered that and have wanted to keep writing it on their projects 😊

During Transportation Week the children really enjoyed making ramps to roll cars down. We would change to angle of the ramps to see how it affected how far the cars would go. We also played vehicle memory, and vehicle board games.

We have been experimenting with baking soda and vinegar and the chemical reaction that occurs when they are mixed. The children used eye droppers to drop vinegar onto the baking soda and we then talked about their observations. They thought it was cool that it bubbled and fizzed.

Show and Tell: March 19/20 please bring two items that rhyme. (To go along with our Dr. Seuss week) An example might be a block and a rock.

Themes for March: Dinosaurs, St. Patrick's Day, and Dr. Seuss.

Spring Break: Just a reminder that spring break is the week of March 25th. Class resumes on April 1st.
