

Miss Karen and Miss Andrea
Junior Class News-Room 5

In the month of March, the class really enjoyed learning about pets. We shared information about how to take care of pets and what kind of pets we have at home. Some of us even brought pictures that show what our pets look like.

In the month of April, Our favorite live science unit will happen, as we watch caterpillars turn into butterflies. We will also learn the nursery rhymes of "Jack and Jill" and "Rain, rain go away".

Learning nursery rhymes and other rhyming words is a great skill builder for reading as your child gets older. Find fun songs with rhyme like: "Down by the Bay", "Five Green and Speckled Frogs", to increase vocabulary and rhyming knowledge.

Our month will end with a fieldtrip to Oakbrook Terrace Nature Center where we will have a presentation about Animal Tracks and see some of the animals housed at the nature center.

Literacy

- "Jack and Jill"
- "Humpty Dumpty"
- Spring Babies
- Very Hungry Caterpillar-Eric Carle
- Munching, Crunching Caterpillar
- Baby Animals
