

## Senior Kiddie Campus Room 1

During the month of October, the children enjoyed learning about Apples, Fall, and Pumpkins. After making predictions about how apples and pumpkins grow, we read stories about them and learned apples grow on trees while pumpkins grow on a vine. They had fun exploring both the outsides and insides of them too.

We used our hand/eye coordination and hand muscles to hammer golf tees into pumpkins. The children really had fun with that exercise!

Some fun items we had in our Sensory Table this past month were: small toy apples with cups and baskets; corn with scoops, cups, and farm animals; and soapy water, sponges, and gourds.

We have had a really nice Fall this year and the children have enjoyed being outside going on walks, drawing with chalk, playing the Light Game, and going to the Playground. Every day when we talk about the weather and look at our Weather Chart, we comment how almost everyday has been sunny and windy 😊

**Please remember to line up at the outside door at 8:55/12:55.  
We will open the door at that time and proceed to get ready for our day!**

During the week of November 11<sup>th</sup>, we will be collecting new winter items for the Outreach Community Center here in town. We will be asking for things like gloves, mittens, hats, and socks. There will be a note sent home with details.

Show and Tell: On November 21/22 we will have Show and Tell. Please talk to your child about what letter their name begins with and then find 3 things that start with their letter.  
E.g.: Amanda could bring an Apple, Airplane, and Alligator
